freee Expense Management Expense Settlement Plus freee spending management Full

freee Accounting and freee Expense Management have a " Purchase Request " function for approvals that involve internal settlement .
This function allows you to create application forms for purchase requests, business trip requests, entertainment expense requests, etc., and then submit and approve them.

Note

This page is **for administrators (those who set up application forms, etc.)** .
For information on how to apply and approve using forms, please see " Applying for and Approving Purchase Requests ."

Feature Overview

The purchasing request function is a function that allows you to flexibly handle the flow of approval for payments from application to approval.
You can create forms in advance according to the application contents that are frequently used in the company's approval flow.

About the application form items

The fields on the purchase request form can be configured according to the purpose of use, such as making them mandatory or hiding them if they are not used.

The explanation of each item is as follows:

Basic settings

Item name	explanation
Application form name	Enter the name of the application form itself.

	screen and application creation screen.
Use of application	Select [Use] to make this form available when creating a new "Purchase Requisition."
Display order	By specifying an integer greater than or equal to 1, you can specify the display order of forms on the "Create a request" screen and the "Request form settings" screen. They are arranged in ascending order of numbers.

Default Item

Item name	explanation
Application title	You can set a request title that will be automatically entered when creating a new request. **Tips** If you enter a function like "Business trip to XX on ${yyyy} year, ${mm} month, ${dd} day", the date will be automatically entered. For example, if you create a request from the purchasing request form on May 20, 2025, the title will be automatically entered as "Business trip to XX on May 1, 2025".
Content	This is the setting item for the input field of the application content. You can set the use, display name, default value, and additional description of this item.
Payment amount	This is the setting item for the input field for the purchase amount. You can set the display name and additional description for this item. *Since input is required for this item, you cannot select "Optional" or "Do not use (hide)."
Tax-excluded setting	If you select "Use", the amount entered in this form will be treated as excluding tax. Consumption tax will not be included in the consumption rate calculation. **When using the tax-excluded setting** • Expense items ○ Calculation will be based on the tax category set for the expense item.

	○ Refers to the selected tax bracket (deductions are not taken into account) • transaction ○ Refers to the selected tax bracket (deductions are not taken into account) • Cards and invoices ○ Calculated at a flat tax rate of 10%
Expected occurrence date	This is a setting item for the input field for the scheduled occurrence date. *The "scheduled occurrence date" refers to the date on which a transaction is scheduled to occur based on the accrual basis. For information on how to use this and the "scheduled payment date," please see " How to use the scheduled occurrence date and scheduled payment date " on this page. You can configure the use of this item, its display name, additional description, and the display of the time period selection. Note Even if you set a display name for this item, it will be displayed as "Scheduled Occurrence Date" in the Purchase Progress Monitor, etc.
Scheduled payment date	This is a setting item for the input field for the scheduled payment date. *For information on how to use this in conjunction with the "scheduled occurrence date," please see " How to use the scheduled occurrence date and scheduled payment date " on this page. You can configure the use of this item, its display name, additional description, and the display of the time period selection. Note Even if you set a display name for this item, it will be displayed as "Scheduled Payment Date" in the Purchase Progress Monitor, etc.

payment method	You can choose from the following options to display: • Invoice payment • Reimbursement of expenses • Corporate Card • Advance payments and petty cash • Not specified
Business Partners	This is a setting item for the input field for the customer. You can set the use of this item and additional explanations.
Item	This is a setting item for the item input field. You can set the use of this item and additional explanations.
Department	This is the setting item for the department input field. You can set the use of this item and additional explanations.
Notetags	This is a setting item for the memo tag input field. You can set the use of this item and additional explanations.
segment	This is a setting item for the segment input field. You can set the use of this item and additional explanations.

File attachments

Item name	Required/Optional settings
File attachments	This is a setting item for attaching images such as receipts and files such as PDFs. You can set the display name, optional/required, and additional description for this item. *If you delete all file attachment items, they will be hidden.

Custom Fields

You can freely add any items you want to the application form.
The following input formats are available for custom items. Please use them according to

Input format (options)	Purpose
Single-line string	It is used for items that are expected to be entered as short text. Examples: business trip destinations, restaurants for dining, URLs, etc.
Multi-line strings	Used for items where long text is expected to be entered. Example: Purpose of purchase, business trip itinerary, etc.
date	It is used for items that are expected to be entered as a single date. For example, the planned date of a dinner party, the planned date of a purchase, etc.
period	It is used for items where you expect to enter a date range. For example, the duration of a business trip .
Number	It is used for items where you expect to enter information such as quantity, amount, distance, etc.
Dropdown	It is used for items where one answer is expected to be selected from multiple options. (The options are only displayed when a selection is made, so it is recommended when there are many options.)
Checkbox	It is used for items where multiple answers are expected to be selected from multiple options.
Radio Button	It is used for items where one selection is expected from multiple options. (It is recommended when there are only a few options, as the options are always displayed expanded.)

remarks

This sets the remarks field.
You can set the use of this field and additional explanations.

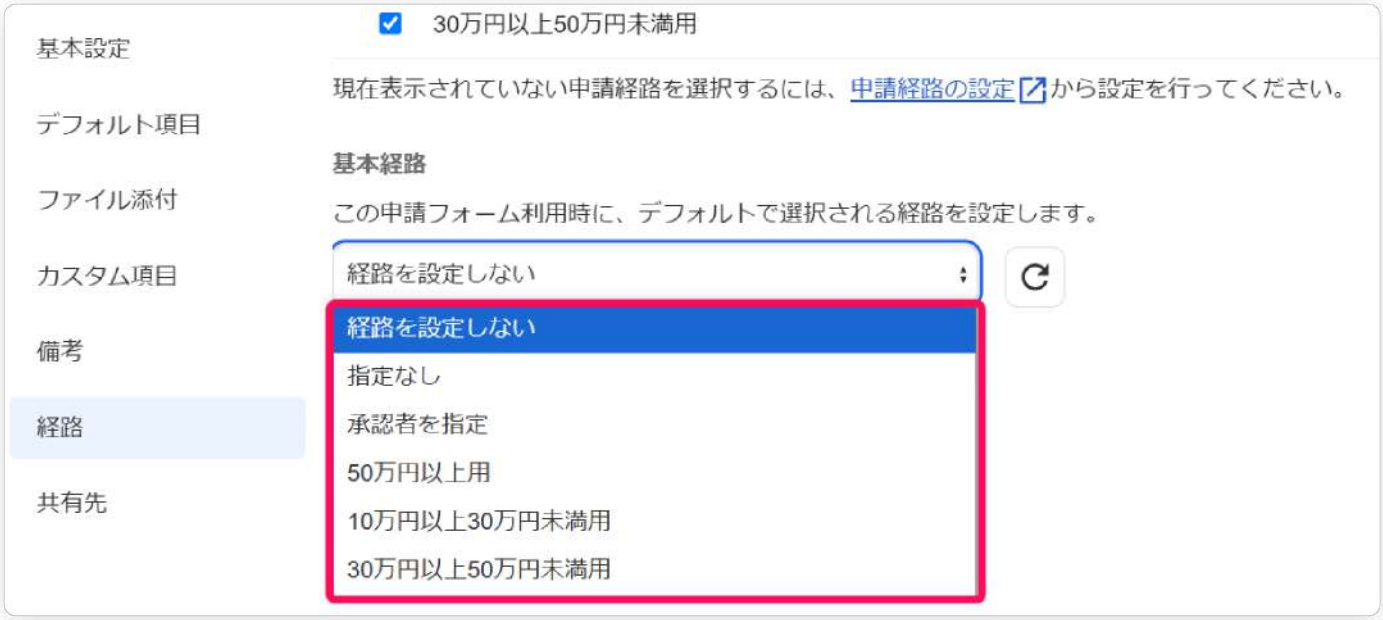
route

For information on setting up application routes, see " Setting application routes for expenses, etc. "

*After setting the application route, click the update button to reflect the latest route.

Basic Route

This sets the route that is selected by default when an application is created using this form.
*If you want to use the amount branching for the application route, please refer to " Setting the amount branching for the application route (purchase application) ".

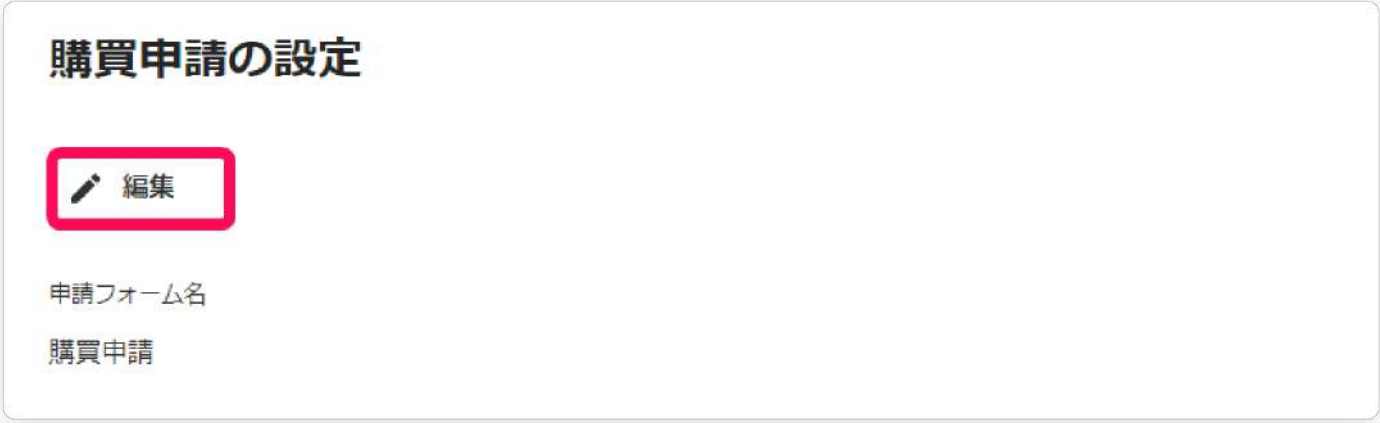


Shared with

Item name	explanation
Adding Sharers	This is a setting item for the input field for sharing destinations. By adding a share destination, users other than the approver can also

Auto-add users	When creating a new form, you can select users and departments to be automatically added as sharing destinations.

When creating a new "Purchase Requisition," select "Use" to be able to use this form.
If there are any parts you want to modify later, open the details screen of the created form from the "Request Form Settings" screen, and click "Edit" to edit various fields.



How to use the expected occurrence date and expected payment date

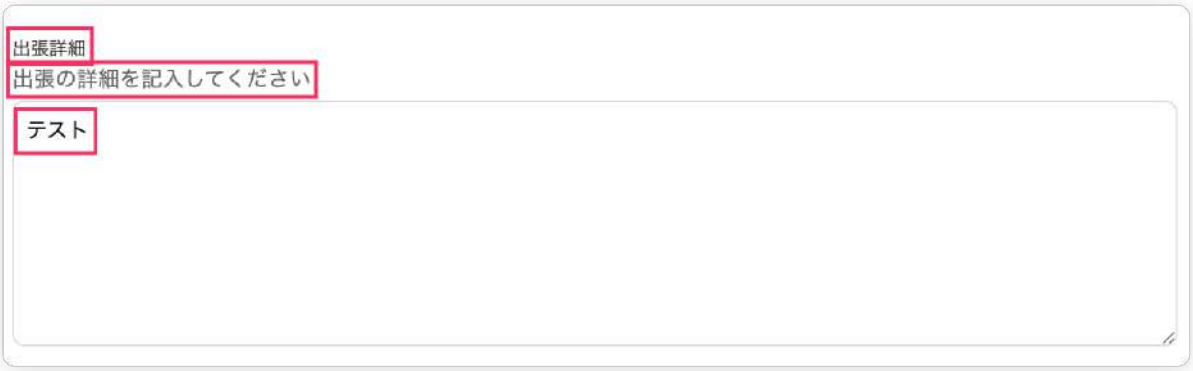
The default fields have two date fields, the expected occurrence date and the expected payment date, but these fields have different meanings.

Expected occurrence date	On an accrual basis, this is the date on which a transaction is scheduled to occur. It is possible to change the labels to scheduled delivery date, scheduled business trip date, scheduled purchase date, etc., but in the list they will be listed as scheduled occurrence date.
Scheduled payment date	This is the expected payment date based on the invoice received, etc. You can change the label, but it will be listed as the expected payment date.

For forms that handle expenses such as entertainment and transportation expenses where the occurrence date and payment date are the same, it is recommended to enable only the expected occurrence date.

Example: **Reflection of the display name, initial value, and additional description for the "Content" item**

- Application form creation screen
  - The "Content" item name will be overwritten with the "Display Name" text.
  - The text entered in "Additional Description" will be entered below the item name.
  - The text entered in "Initial Value" will be entered in the input field.



Create a purchase requisition form

Follow the steps below to create a purchase requisition form.

1. Click the [Application Settings] menu → [Application Form].

2. Select the [Purchase Requisition] tab and click the [+ Create a new request form] button.

Editing the Purchase Requisition Form

4 After modifying settings or adding items, click the [Save] button.

Delete the purchase requisition form

1 Click the [Application Settings] menu → [Application Form].

freee ヘルプセンター

3 Click the [...] button → [Delete].

4 When the "Delete purchase requisition form" screen appears, click the [Delete] button.

Note

Once deleted, it cannot be undone. Please confirm before deleting.

fulfillment rate for purchase requests.
For details, please see " About the fulfillment rate for purchase requests ."

Reference: Future updates to the purchase request function

Purchasing requests are a feature that was released around October 2023.
Going forward, we will further update purchasing requests, aiming to resolve issues with approvals and related tasks that involve payments.

Please see " Upcoming Updates " for more details.

Reference: How to use the various application functions

The Purchasing Requisition is a function that assumes approvals that involve payments, such as purchasing requests, business trip requests, and entertainment expense requests.
The various application functions, which are general-purpose approval and workflow functions, should be used mainly for contract approvals that do not involve payments.

Also, depending on the update status of the purchasing request, some functions available in various applications may not be supported.
If you require application and approval functions that require more complex forms or routes, please use the various application functions.

For details about unsupported functions, please see " Functional differences with various applications ."
